

- What is the difference between "Watch Function" and "Immediate readout"?
- Is not the real question one of
 - Scanning for programming & reprogramming purposes or
 - Doing that plus some substantive readout?

Declass Review by NIMA/DOD

- What is the nature of the increment NRT would give?
- Now we (Hes) see and hear thru the eyes and ears of other humans & machines whose reports on what they hear & see are transmitted to us.
- NRT would enable us to program "seeing" at prescribed times to a greater extent than is now possible.

17 Dec 69

NRT Objectives -

- ? - Long term signal storage.
(3 mos? 6 mos? 1 yr?)
(selected targets?) tapes vs. computer?
- ? - Automated target coverage determination, with the loop swinging back into tasking.
- A situational tasking cum exploitation capability -- for use as needed (called for)
- An ordered tasking schedule complemented by an ordered exploitation schedule, as the regular way of doing business.
